Doc. no.: 1006793

Date: 15 August 2012

AGENDA
for
technical dialogue on the supply of a non-remote electronic voting and
counting system for application in statutory elections in Denmark

1. Introduction by the Ministry of Economic Affairs and the Interior

- Brief introduction of the meeting participants
- Background: Danish government decision to allow trials with e-voting at statutory elections, present stage of project and further steps
- Purpose of the meeting and the technical dialogue
- Confidentiality, minutes and summary report

2. Demonstration of e-voting system (approx. 45 minutes)

3. Questions by the Ministry and other meeting participants re. *inter alia*:

- Protection of the secrecy of the vote in general by the e-voting system.
- Protection of the secrecy of the vote in particular by the use of dedicated hardware vis-à-vis the use of non-dedicated hardware, including processes for safe destruction of sensitive data.
- The securing by the e-voting system that the polling has passed off without incident, including by the production of a physical manifestation of the vote (VVPAT or similar) that can both offer sufficient proof to the voter that the polling has passed off correctly and be included in a manual recount.
- The safeguarding by the system of correct polling and registration of the vote and the possibility to control that the system has not failed or been manipulated along the way (security).
- The possibility to secure accessibility to the system for the disabled.
- The economic implications of introducing the e-voting system of the company/ies in question in Denmark, divided into the expenses for a) the purchase or leasing/accommodation of hardware, b) the purchase or leasing of soft ware, c) service and operation, back-up, training, maintenance etc.
- Possibilities for further development of the system and possibilities to adjust the e-voting system for future needs and update it to exploit new technological possibilities (possibility for agile development and innovation).
- Possibility of scaling of the system, including information on the possibility to separate the polling and counting functionalities, so that the system initially could be limited to ballot marking, but later can be connected to a digital counting device if desired.
- Usability and accessibility in general and for the disabled in particular
- Advantages and gains of e-voting in general and in particular from employing the e-voting solution demonstrated

A maximum of 3 hours has been allocated for the meeting, of which approx. 45 minutes have been set aside for a demonstration of the supplier's e-voting technology.

Internet address(es):

General address of the contracting authority: <http://www.oim.dk>
Address of the buyer profile: <http://valg.im.dk/English.aspx>

Further information can be obtained from: The above mentioned contact point(s)

I.2) Type of the contracting authority

Ministry or any other national or federal authority, including their regional or local sub-divisions

I.3) Main activity

General public services

I.4) Contract award on behalf of other contracting authorities

The contracting authority is purchasing on behalf of other contracting authorities: no

Section II.B: Object of the contract (Supplies or services)

II.1) Title attributed to the contract by the contracting authority:

Supply of a non-remote electronic voting and counting system for application in statutory elections, i.e. parliamentary elections, elections of Danish members to the European Parliament, local and regional government elections and national referenda (technical dialogue with economic operators).

II.2) Type of contract and place of delivery or of performance

Service category No 7: Computer and related services
NUTS code DK01

II.3) Information on framework agreement

II.4) Short description of nature and quantity or value of supplies or services:

Prior to the tender procedure for the supply of a system for non-remote electronic voting and counting (hence referred to as an *ile-voting system*), the Ministry of Economic Affairs and the Interior wishes to hold a technical dialogue with economic operators as further specified below under point II.8), where the conditions for participation are also stated. The deadline for request by economic operators to participate in the technical dialogue is 3 August 2012 at 12:00 noon CEST.

It is presupposed that the e-voting system will be used only for non-remote electronic voting in a controlled environment at polling stations on election day and/or for advanced voting on the premises of the municipalities; not for voting over the internet or by other remote voting channels. The system shall thus be employable for the following phases: preparation before the election, polling, counting and notification of the results as well as packing and storing.

The system has to be adaptable to the Danish context and election traditions, i.e. inter alia be designed to secure a high degree of recognizability for voters and a continued high trust in elections. The Danish turn-out is among the highest in the world for countries where voting is not mandatory (87.7 per cent at the last general election in September 2011; approx. 65 per cent at local elections). The system must therefore be designed in such a way that the high turn-out and trust in elections are maintained.

Digitalization of the polling implies that some of the control mechanisms meant to ensure public control with the elections will be replaced by digitalized procedures, which can only be checked by specialists with particular insight in it-systems etc. Public control mechanisms in a Danish context would e.g. be the demonstration and subsequent sealing of the empty ballot boxes in front of the voters in attendance before the elections commence at 9:00 a.m., and the voters' right to watch the manual count of the votes after the election is closed at 8:00 p.m. To ensure a continued high trust in elections – hitherto obtained and preserved inter alia via the aforementioned public control mechanisms – the Ministry is interested in obtaining information on alternative control mechanisms. These should provide the voter with a comparable high degree of trust that the polling has progressed correctly, i.e. without system failures or any manipulation with the elections. The system shall also be trustworthy and robust and ensure that the election can continue even if the system malfunctions partly or completely during the polling.

The system must also guarantee the secrecy of the vote, which in the Danish context entails that the voter not only has the right to keep his/her vote secret, but is also under the obligation to do so, i.e. the voter is not free to show his/her vote to others. In addition, it must be impossible to connect a voter and the vote he/she has cast, including indirectly by e.g. logging or electronic detection of screen displays or the like by external devices etc. The system must also be user-friendly and readily accessible to all voters, including voters with disabilities.

II.5) Common procurement vocabulary (CPV)

72000000

II.6) Scheduled date for start of award procedures

II.7) Information about Government Procurement Agreement (GPA)

II.8) Additional information:

As part of the preparation of the tender process, the Ministry of Economic Affairs and the Interior wishes to explore the possibilities that the market has to offer at this point in time, and to get an overview of the economic implications of introducing e-voting in Denmark. As part of a preliminary study, the Ministry of Economic Affairs and the Interior therefore wishes to consult with economic operators before embarking on the planned tender process.

Economic operators interested in participating in the dialogue are invited to forward a request for participation to the e-mail address stated above under point I.1). A request for participation in the technical dialogue must be received by the Ministry by 3.8.2012 at 12 noon CEST. The request must include information on which company/ies are requesting to participate.

The Ministry of Economic Affairs and the Interior is interested in consulting with economic operators that have documented experience with the development, implementation and operation of electronic voting systems for larger companies/institutions, including in particular public institutions. Preference will be given to economic operators that have experience with the development and implementation of electronic voting and counting systems for elections to popularly elected organs.

Particularly out of regard for the resources allocated by the Ministry to carry out the preliminary study, a maximum of eight companies/partnerships will be invited to the technical dialogue. In the event that more than eight companies/partnerships request to participate in the technical dialogue, the Ministry of Economic Affairs and the Interior will invite all companies/partnerships that have documented experience with development, delivery, implementation and operation of electronic voting systems for larger companies/institutions, including in particular public institutions. If more than eight companies/partnerships can document such experience, the Ministry will select those companies/partnerships that have documented experience with the development and implementation of electronic voting and counting systems for elections to popularly elected organs, i.e. elections for national or local parliaments or governments etc. In the event that there henceforth are more than eight companies/partnerships qualified for selection according to the above mentioned criteria, lots will be drawn amongst these.

Invitation to participate in the dialogue will therefore be sent out to companies/partnerships from which the Ministry has received a request for participation by e-mail before the expiry of the deadline, and which have documented experience in delivering products or solutions that match the description above and at the present market such products OG solutions.

For each invited company or partnership the technical dialogue will consist of one bilateral meeting between the company/ies in question and the Ministry of Economic Affairs and the Interior. The meeting will last approx. 3 hours, of which approx. 45 minutes will be set aside for a demonstration of the e-voting system of the company/ies in question.

In addition, the Ministry of Economic Affairs and the Interior wishes to gain closer insight into inter alia the following issues:

1. Protection of the secrecy of the vote in general by the e-voting system.
2. Protection of the secrecy of the vote in particular by the use of dedicated hardware vis-à-vis the use of non-dedicated hardware, including processes for safe destruction of sensitive data.
3. The securing by the e-voting system that the polling has passed off without incident, including by the production of a physical manifestation of the vote (VVPAT or similar) that can both offer sufficient proof to the voter that the polling has passed off correctly and be included in a manual recount.
4. The safeguarding by the system of correct polling and registration of the vote and the possibility to control that the system has not failed or been manipulated along the way.
5. The possibility to secure accessibility to the system for the disabled.
6. The economic implications of introducing the e-voting system of the company/ies in question in Denmark, divided into the expenses for a) the purchase or leasing/accommodation of hardware, b) the purchase or leasing of soft ware, c) service and operation etc.
7. Possibilities for further development of the system and possibilities to adjust the e-voting system for future needs and update it to exploit new technological possibilities (possibility for agile development).
8. Possibility of scaling of the system, including information on the possibility to separate the polling and counting functionalities, so that the system initially could be limited to ballot marking, but later can be connected to a digital counting device if desired.

The meetings will be held at the Ministry of Economic Affairs and the Interior during the weeks 34 and 35 according to further arrangement with the individual company or partnership. The meetings will be carried out in Danish as a starting point, but can also be carried out in English.

The Ministry of Economic Affairs and the Interior reserves the right to use any information imparted by the companies in a request for participation or during the technical dialogue for the subsequent tender, unless the companies have stated as a prior condition that information is imparted in confidentiality, constitutes a commercial secret or consists of exclusive rights. Please note that the Ministry of Economic Affairs and the

Interior as a public authority is subject to the Public Records Act. Notwithstanding any confidentiality statements etc. made by participating companies, the Ministry can thus be obliged to give access to documents etc. to the extent following from its obligations under the Public Records Act. For good measure, please be informed that any expenses which companies might incur by participating in the technical dialogue will not be reimbursed by the Ministry.

The Ministry of Economic Affairs and the Interior will draw up a report upon completion of the technical dialogue regarding the future tender process for the purchase of an e-voting system, in which a sum-up of the process and any additional information that may arise will be included. The report will be made publicly available at: <http://valg.im.dk>.

Section III: Legal, economic, financial and technical information

Dear Mike,

Please find enclosed an agenda for the Ministry's technical dialogue with Everyone Counts on **Tuesday 28 August 2012, 9:30-12:30**, as well as the TED notice no. 2012/S 122-201846.

The following persons from the Ministry and our partners will be participating in the meeting:

Ministry of Economic Affairs and the Interior:

- Christian Vigh, Head of Division
- Nicoline Nyholm Miller, Chief Election Officer
- Louise Brandt Olsen or Maj Skytte Petersen, Heads of Section (keepers of the minutes)

Kammeradvokaten (Legal Adviser to the Danish Government):

- Marianne Søgaard or
- Milena Anguelova Krogsgaard

The municipalities:

- John Bonnerup, Head of IT-security, Municipality of Odense
- Jesper Eltved, Project Manager, Municipality of Aarhus
- Mette Marie Sundbøll, Chief Election Officer, Municipality of Copenhagen

PwC (technical adviser):

- Mikael Buchholtz, Manager

Looking forward to see you in a couple of weeks.

Kind regards,

Chief Election Officer
Nicoline Nyholm Miller

Dear Cristina,

Please find enclosed an agenda for the Ministry's technical dialogue with Indra on **Tuesday 21 August 2012, 9:30-12:30**, as well as the TED notice no. 2012/S 122-201846.

The following persons from the Ministry and our partners will be participating in the meeting:

Ministry of Economic Affairs and the Interior:

- Christian Vigh, Head of Division
- Nicoline Nyholm Miller, Chief Election Officer
- Louise Brandt Olsen *or* Maj Skytte Petersen, Heads of Section (keepers of the minutes)

Kammeradvokaten (Legal Adviser to the Danish Government):

- Marianne Søgård *or*
- Milena Anguelova Krogsgaard

The municipalities:

- John Bonnerup, Head of IT-security, Municipality of Odense
- Jesper Eltvéd, Project Manager, Municipality of Aarhus
- Mette Marie Sundbøll, Chief Election Officer, Municipality of Copenhagen

PwC (technical adviser):

- Mikael Buchholtz, Manager

Looking forward to meet you next week.

Best regards,

Chief Election Officer
Nicoline Nyholm Miller

Date: 15 August 2012

AGENDA
for
technical dialogue on the supply of a non-remote electronic voting and
counting system for application in statutory elections in Denmark

1. Introduction by the Ministry of Economic Affairs and the Interior

- Brief introduction of the meeting participants
- Background: Danish government decision to allow trials with e-voting at statutory elections, present stage of project and further steps
- Purpose of the meeting and the technical dialogue
- Confidentiality, minutes and summary report

2. Demonstration of e-voting system (approx. 45 minutes)

3. Questions by the Ministry and other meeting participants re. *inter alia*:

- Protection of the secrecy of the vote in general by the e-voting system.
- Protection of the secrecy of the vote in particular by the use of dedicated hardware vis-à-vis the use of non-dedicated hardware, including processes for safe destruction of sensitive data.
- The securing by the e-voting system that the polling has passed off without incident, including by the production of a physical manifestation of the vote (VVPAT or similar) that can both offer sufficient proof to the voter that the polling has passed off correctly and be included in a manual recount.
- The safeguarding by the system of correct polling and registration of the vote and the possibility to control that the system has not failed or been manipulated along the way (security).
- The possibility to secure accessibility to the system for the disabled.
- The economic implications of introducing the e-voting system of the company/ies in question in Denmark, divided into the expenses for a) the purchase or leasing/accommodation of hardware, b) the purchase or leasing of software, c) service and operation, back-up, training, maintenance etc.
- Possibilities for further development of the system and possibilities to adjust the e-voting system for future needs and update it to exploit new technological possibilities (possibility for agile development and innovation).
- Possibility of scaling of the system, including information on the possibility to separate the polling and counting functionalities, so that the system initially could be limited to ballot marking, but later can be connected to a digital counting device if desired.
- Usability and accessibility in general and for the disabled in particular
- Advantages and gains of e-voting in general and in particular from employing the e-voting solution demonstrated

A maximum of 3 hours has been allocated for the meeting, of which approx. 45 minutes have been set aside for a demonstration of the supplier's e-voting technology.

Services

Directive 2004/18/EC

Section I: Contracting authority

I.1) Name, addresses and contact point(s)

Ministry of Economic Affairs and the Interior
Slotsholmsgade 10-12
For the attention of: Chief Election Officer Nicoline Nyholm Miller
1216 Copenhagen K
DENMARK
Telephone: +45 72282522
E-mail: valg@oim.dk

Internet address(es):

General address of the contracting authority: <http://www.oim.dk>
Address of the buyer profile: <http://valg.im.dk/English.aspx>

Further information can be obtained from: The above mentioned contact point(s)

I.2) Type of the contracting authority

Ministry or any other national or federal authority, including their regional or local sub-divisions

I.3) Main activity

General public services

I.4) Contract award on behalf of other contracting authorities

The contracting authority is purchasing on behalf of other contracting authorities: no

Section II.B: Object of the contract (Supplies or services)

II.1) Title attributed to the contract by the contracting authority:

Supply of a non-remote electronic voting and counting system for application in statutory elections, i.e. parliamentary elections, elections of Danish members to the European Parliament, local and regional government elections and national referenda (technical dialogue with economic operators).

II.2) Type of contract and place of delivery or of performance

Service category No 7: Computer and related services
NUTS code DK01

II.3) Information on framework agreement

II.4) Short description of nature and quantity or value of supplies or services:

Prior to the tender procedure for the supply of a system for non-remote electronic voting and counting (hence referred to as an ~~ile-voting system~~), the Ministry of Economic Affairs and the Interior wishes to hold a technical dialogue with economic operators as further specified below under point II.8), where the conditions for participation are also stated. The deadline for request by economic operators to participate in the technical dialogue is 3 August 2012 at 12:00 noon CEST.

It is presupposed that the e-voting system will be used only for non-remote electronic voting in a controlled environment at polling stations on election day and/or for advanced voting on the premises of the municipalities; not for voting over the internet or by other remote voting channels. The system shall thus be employable for the following phases: preparation before the election, polling, counting and notification of the results as well as packing and storing.

The system has to be adaptable to the Danish context and election traditions, i.e. inter alia be designed to secure a high degree of recognizability for voters and a continued high trust in elections. The Danish turn-out is among the highest in the world for countries where voting is not mandatory (87.7 per cent at the last general election in September 2011; approx. 65 per cent at local elections). The system must therefore be designed in such a way that the high turn-out and trust in elections are maintained.

Digitalization of the polling implies that some of the control mechanisms meant to ensure public control with the elections will be replaced by digitalized procedures, which can only be checked by specialists with particular insight in it-systems etc. Public control mechanisms in a Danish context would e.g. be the demonstration and subsequent sealing of the empty ballot boxes in front of the voters in attendance before the elections commence at 9:00 a.m., and the voters' right to watch the manual count of the votes after the election is closed at 8:00 p.m. To ensure a continued high trust in elections – hitherto obtained and preserved inter alia via the aforementioned public control mechanisms – the Ministry is interested in obtaining information on alternative control mechanisms. These should provide the voter with a comparable high degree of trust that the polling has progressed correctly, i.e. without system failures or any manipulation with the elections. The system shall also be trustworthy and robust and ensure that the election can continue even if the system malfunctions partly or completely during the polling.

The system must also guarantee the secrecy of the vote, which in the Danish context entails that the voter not only has the right to keep his/her vote secret, but is also under the obligation to do so, i.e. the voter is not free to show his/her vote to others. In addition, it must be impossible to connect a voter and the vote he/she has cast, including indirectly by e.g. logging or electronic detection of screen displays or the like by external devices etc. The system must also be user-friendly and readily accessible to all voters, including voters with disabilities.

II.5) **Common procurement vocabulary (CPV)**
72000000

II.6) **Scheduled date for start of award procedures**

II.7) **Information about Government Procurement Agreement (GPA)**

II.8) **Additional information:**

As part of the preparation of the tender process, the Ministry of Economic Affairs and the Interior wishes to explore the possibilities that the market has to offer at this point in time, and to get an overview of the economic implications of introducing e-voting in Denmark. As part of a preliminary study, the Ministry of Economic Affairs and the Interior therefore wishes to consult with economic operators before embarking on the planned tender process.

Economic operators interested in participating in the dialogue are invited to forward a request for participation to the e-mail address stated above under point I.1). A request for participation in the technical dialogue must be received by the Ministry by 3.8.2012 at 12 noon CEST. The request must include information on which company/ies are requesting to participate.

The Ministry of Economic Affairs and the Interior is interested in consulting with economic operators that have documented experience with the development, implementation and operation of electronic voting systems for larger companies/institutions, including in particular public institutions. Preference will be given to economic operators that have experience with the development and implementation of electronic voting and counting systems for elections to popularly elected organs.

Particularly out of regard for the resources allocated by the Ministry to carry out the preliminary study, a maximum of eight companies/partnerships will be invited to the technical dialogue. In the event that more than eight companies/partnerships request to participate in the technical dialogue, the Ministry of Economic Affairs and the Interior will invite all companies/partnerships that have documented experience with development, delivery, implementation and operation of electronic voting systems for larger companies/institutions, including in particular public institutions. If more than eight companies/partnerships can document such experience, the Ministry will select those companies/partnerships that have documented experience with the development and implementation of electronic voting and counting systems for elections to popularly elected organs, i.e. elections for national or local parliaments or governments etc. In the event that there henceforth are more than eight companies/partnerships qualified for selection according to the above mentioned criteria, lots will be drawn amongst these.

Invitation to participate in the dialogue will therefore be sent out to companies/partnerships from which the Ministry has received a request for participation by e-mail before the expiry of the deadline, and which have documented experience in delivering products or solutions that match the description above and at the present market such products OG solutions.

For each invited company or partnership the technical dialogue will consist of one bilateral meeting between the company/ies in question and the Ministry of Economic Affairs and the Interior. The meeting will last approx. 3 hours, of which approx. 45 minutes will be set aside for a demonstration of the e-voting system of the company/ies in question.

In addition, the Ministry of Economic Affairs and the Interior wishes to gain closer insight into inter alia the following issues:

1. Protection of the secrecy of the vote in general by the e-voting system.
2. Protection of the secrecy of the vote in particular by the use of dedicated hardware vis-à-vis the use of non-dedicated hardware, including processes for safe destruction of sensitive data.
3. The securing by the e-voting system that the polling has passed off without incident, including by the production of a physical manifestation of the vote (VVPAT or similar) that can both offer sufficient proof to the voter that the polling has passed off correctly and be included in a manual recount.
4. The safeguarding by the system of correct polling and registration of the vote and the possibility to control that the system has not failed or been manipulated along the way.
5. The possibility to secure accessibility to the system for the disabled.
6. The economic implications of introducing the e-voting system of the company/ies in question in Denmark, divided into the expenses for a) the purchase or leasing/accommodation of hardware, b) the purchase or leasing of soft ware, c) service and operation etc.
7. Possibilities for further development of the system and possibilities to adjust the e-voting system for future needs and update it to exploit new technological possibilities (possibility for agile development).
8. Possibility of scaling of the system, including information on the possibility to separate the polling and counting functionalities, so that the system initially could be limited to ballot marking, but later can be connected to a digital counting device if desired.

The meetings will be held at the Ministry of Economic Affairs and the Interior during the weeks 34 and 35 according to further arrangement with the individual company or partnership. The meetings will be carried out in Danish as a starting point, but can also be carried out in English.

The Ministry of Economic Affairs and the Interior reserves the right to use any information imparted by the companies in a request for participation or during the technical dialogue for the subsequent tender, unless the companies have stated as a prior condition that information is imparted in confidentiality, constitutes a commercial secret or consists of exclusive rights. Please note that the Ministry of Economic Affairs and the

Interior as a public authority is subject to the Public Records Act. Notwithstanding any confidentiality statements etc. made by participating companies, the Ministry can thus be obliged to give access to documents etc. to the extent following from its obligations under the Public Records Act. For good measure, please be informed that any expenses which companies might incur by participating in the technical dialogue will not be reimbursed by the Ministry.

The Ministry of Economic Affairs and the Interior will draw up a report upon completion of the technical dialogue regarding the future tender process for the purchase of an e-voting system, in which a sum-up of the process and any additional information that may arise will be included. The report will be made publicly available at: <http://valg.im.dk>.

Section III: Legal, economic, financial and technical information

III.1) Conditions relating to the contract

III.1.1) Main financing conditions and payment arrangements and/or reference to the relevant provisions governing them:

III.2) Conditions for participation

III.2.1) Information about reserved contracts

Section VI: Complementary information

VI.1) Information about European Union funds

The contract is related to a project and/or programme financed by European Union funds: no

VI.2) Additional information:

Please see above under point I.1) re. relevant contact points and II.8) re. the organisation of a technical dialogue.

VI.3) Information on general regulatory framework

VI.4) Date of dispatch of this notice:

Dear John,

Please find enclosed an agenda for the Ministry's technical dialogue with DRS Data Services on **Monday 20 August 2012, 13:30-16:30**, as well as the TED notice no. 2012/S 122-201846.

Also, would you kindly inform me at your earliest convenience of the names of the representatives from DRS that will be attending the technical dialogue?

The following persons from the Ministry and our partners will be participating in the meeting:

Ministry of Economic Affairs and the Interior:

- Christian Vigh, Head of Division
- Nicoline Nyholm Miller, Chief Election Officer
- Louise Brandt Olsen *eller* Maj Skytte Petersen, Heads of Section (keepers of the minutes)

Kammeradvokaten (Legal Adviser to the Danish Government):

- Marianne Søgaard *or*
- Milena Anguelova Krogsgaard

The municipalities:

- John Bonnerup, Head of IT-security, Municipality of Odense
- Jesper Eltved, Project Manager, Municipality of Aarhus
- Mette Marie Sundbøll, Chief Election Officer, Municipality of Copenhagen

PwC (technical adviser):

- Mikael Buchholtz, Manager

Looking forward to meet you next week.

Dear Stella,

Thank you for your prompt response. As we are meeting with another company before you in the same meeting room, I am sorry to say that I will not be able to give you access to the meeting room before 12:30 noon instead of 12:00 noon as earlier announced – I hope this will be ok – if you need more time to set up your equipment, we can postpone our meeting for half an hour or so.

Best regards,

Nicoline Miller

Preference will be given to economic operators that have experience with the development and implementation of electronic voting and counting systems for elections to popularly elected organs.

Particularly out of regard for the resources allocated by the Ministry to carry out the preliminary study, a maximum of eight companies/partnerships will be invited to the technical dialogue. In the event that more than eight companies/partnerships request to participate in the technical dialogue, the Ministry of Economic Affairs and the Interior will invite all companies/partnerships that have documented experience with development, delivery, implementation and operation of electronic voting systems for larger companies/institutions, including in particular public institutions. If more than eight companies/partnerships can document such experience, the Ministry will select those companies/partnerships that have documented experience with the development and implementation of electronic voting and counting systems for elections to popularly elected organs, i.e. elections for national or local parliaments or governments etc. In the event that there henceforth are more than eight companies/partnerships qualified for selection according to the above mentioned criteria, lots will be drawn amongst these.

Invitation to participate in the dialogue will therefore be sent out to companies/partnerships from which the Ministry has received a request for participation by e-mail before the expiry of the deadline, and which have documented experience in delivering products or solutions that match the description above and at the present market such products OG solutions.

For each invited company or partnership the technical dialogue will consist of one bilateral meeting between the company/ies in question and the Ministry of Economic Affairs and the Interior. The meeting will last approx. 3 hours, of which approx. 45 minutes will be set aside for a demonstration of the e-voting system of the company/ies in question.

In addition, the Ministry of Economic Affairs and the Interior wishes to gain closer insight into inter alia the following issues:

1. Protection of the secrecy of the vote in general by the e-voting system.
2. Protection of the secrecy of the vote in particular by the use of dedicated hardware vis-à-vis the use of non-dedicated hardware, including processes for safe destruction of sensitive data.
3. The securing by the e-voting system that the polling has passed off without incident, including by the production of a physical manifestation of the vote (VVPAT or similar) that can both offer sufficient proof to the voter that the polling has passed off correctly and be included in a manual recount.
4. The safeguarding by the system of correct polling and registration of the vote and the possibility to control that the system has not failed or been manipulated along the way.
5. The possibility to secure accessibility to the system for the disabled.
6. The economic implications of introducing the e-voting system of the company/ies in question in Denmark, divided into the expenses for a) the purchase or leasing/accommodation of hardware, b) the purchase or leasing of soft ware, c) service and operation etc.
7. Possibilities for further development of the system and possibilities to adjust the e-voting system for future needs and update it to exploit new technological possibilities (possibility for agile development).
8. Possibility of scaling of the system, including information on the possibility to separate the polling and counting functionalities, so that the system initially could be limited to ballot marking, but later can be connected to a digital counting device if desired.

The meetings will be held at the Ministry of Economic Affairs and the Interior during the weeks 34 and 35 according to further arrangement with the individual company or partnership. The meetings will be carried out in Danish as a starting point, but can also be carried out in English.

The Ministry of Economic Affairs and the Interior reserves the right to use any information imparted by the companies in a request for participation or during the technical dialogue for the subsequent tender, unless the companies have stated as a prior condition that information is imparted in confidentiality, constitutes a commercial secret or consists of exclusive rights. Please note that the Ministry of Economic Affairs and the

Interior as a public authority is subject to the Public Records Act. Notwithstanding any confidentiality statements etc. made by participating companies, the Ministry can thus be obliged to give access to documents etc. to the extent following from its obligations under the Public Records Act. For good measure, please be informed that any expenses which companies might incur by participating in the technical dialogue will not be reimbursed by the Ministry.

The Ministry of Economic Affairs and the Interior will draw up a report upon completion of the technical dialogue regarding the future tender process for the purchase of an e-voting system, in which a sum-up of the process and any additional information that may arise will be included. The report will be made publicly available at: <http://valg.im.dk>.

Section III: Legal, economic, financial and technical information

III.1) Conditions relating to the contract

III.1.1) Main financing conditions and payment arrangements and/or reference to the relevant provisions governing them:

III.2) Conditions for participation

III.2.1) Information about reserved contracts

Section VI: Complementary information

VI.1) Information about European Union funds

The contract is related to a project and/or programme financed by European Union funds: no

VI.2) Additional information:

Please see above under point I.1) re. relevant contact points and II.8) re. the organisation of a technical dialogue.

VI.3) Information on general regulatory framework

VI.4) Date of dispatch of this notice:

26.6.2012

Vedhæftede filer: TED notice.pdf; Agenda technical dialogue.pdf

Dear Stella,

Please find enclosed an agenda for the Ministry's technical dialogue with Opt2vote on **Tuesday 21 August 2012, 13:30-16:30**, as well as the TED notice no. 2012/S 122-201846. Also, our meeting in the morning has been rescheduled, so if you want access to the meeting room a little earlier than 12:30 it could easily be arranged.

Also, would you kindly inform me at your earliest convenience of the names of the representatives from Opt2vote that will be attending the technical dialogue?

The following persons from the Ministry and our partners will be participating in the meeting:

Ministry of Economic Affairs and the Interior:

- Christian Vigh, Head of Division
- Nicoline Nyholm Miller, Chief Election Officer
- Louise Brandt Olsen *eller* Maj Skytte Petersen, Heads of Section (keepers of the minutes)

Kammeradvokaten (Legal Adviser to the Danish Government):

- Marianne Søgaaard *or*
- Milena Anguelova Krogsgaard

The municipalities:

- John Bonnerup, Head of IT-security, Municipality of Odense
- Jesper Eltved, Project Manager, Municipality of Aarhus
- Mette Marie Sundbøll, Chief Election Officer, Municipality of Copenhagen

PwC (technical adviser):

- Mikael Buchholtz, Manager

Looking forward to meet you next week.

Best regards,

Chief Election Officer
Nicoline Nyholm Miller

Dear Stella,

Thank you for your prompt response. As we are meeting with another company before you in the same meeting room, I am sorry to say that I will not be able to give you access to the meeting room before 12:30 noon instead of 12:00 noon as earlier announced – I hope this will be ok – if you need more time to set up your equipment, we can postpone our meeting for half an hour or so.

Best regards,

Nicoline Miller

Dear Nicoline

Thank you for your kind invitation to the meeting in Denmark next Monday.
Unfortunately we are not in a position to attend on that day and would like to request an alternative date.

This is a very difficult period as traditionally the last two weeks of August are the busiest time for Summer Holidays . This year many others have delayed holidays until after the London 2012 Olympics and consequently the relevant staff are not available.

Would it be possible to arrange a date during week commencing 3 September?

We are also keen to involve a partner in the discussions and we await information regarding their availability.
Thank you for your patience and apologies for any inconvenience this situation may have caused.

Kind Regards

Gary

Kære alle

Jeg har hermed noteret Jesper Eltved, John Bonnerup og Mette Marie som repræsentanter for kommunerne til deltagelse i samtlige møder i den tekniske dialog. Der er i øvrigt sket en lille ændring i planen, idet Assembly Voting har bedt om at få udskudt deres møde til ugen efter. Planen ser herefter ud som følger (idet jeg regner med, at det er den endelige plan, da jeg nu har modtaget bekræftelser fra alle leverandører):

Firma	Uge 34	Uge 35	Uge 36
DRS	Mandag 20/8 kl. 13:30-16:30 <i>Mødelokale B</i>		
Indra	Tirsdag 21/8 kl. 9:30-12:30 <i>Mødelokale G</i>		
Opt2vote	Tirsdag 21/8 kl. 13:30-16:30 <i>Mødelokale G</i>		
Everyone Counts		Tirsdag 28/8 kl. 9:30-12:30 <i>Mødelokale C</i>	
Assembly Voting		Tirsdag 28/8 kl. 13:30-16:30 <i>Mødelokale B</i>	
Scytl		Onsdag 29/8 kl. 10:00-13:00 <i>Mødelokale B</i>	
KMD/Smartmatic			Mandag 3/9 kl. 9:30-12:30 <i>Mødelokale B</i>

Mødedeltagere:

Indenrigs- og Økonomiministeriet:

- Christian Vigh, kontorchef, Kontoret for Kommunaljura
- Nicoline Nyholm Miller, valgkonsulent
- Louise Brandt Olsen *eller* Maj Skytte Petersen, fuldmægtige (referenter)

Kammeradvokaten:

- Marianne Søgaard *eller* Milena Anguelova Krogsgaard

- Emil Bisgaard, advokatfuldmægtig (evt.)

Kommunerne:

- John Bonnerup, IT-sikkerhedsleder, Odense Kommune
- Jesper Eltved, projektleder, Aarhus Kommune
- Mette Marie Sundbøll, valgkonsulent, Københavns Kommune

PwC (teknisk rådgiver):

- Mikael Buchholtz, manager

Bemærk, at mødetiden er ½ time før det ovenfor angivne (på Christian Vighs kontor, hvis I ved, hvor det ligger, ellers bed vagten om at ringe efter mig, så skal jeg komme ned og hente jer), så vi kan nå et formøde inden mødet med leverandørerne. Ministeriet sørger for frokost de dage, hvor der er dobbeltmøder, dvs. den 21/8 og 29/8. Materialet fra leverandørerne har I fået tilsendt ved en tidligere lejlighed – husk at medbringe dette ☺

Jeg vedhæfter endvidere en dagsorden for den tekniske dialog samt den oprindelige TED-annonce, som begge vil blive sendt ud til leverandørerne senere i dag.

Hvis I har nogen spørgsmål til ovenstående, er I meget velkomne til at kontakte mig, ellers ses vi bare på mandag kl. 13:00.

Bedste hilsener
Nicoline

Kære alle
Jeg har allerede tilsagn fra Århus (Jesper) og Odense (John) om deltagelse i alle møder – det ville være fint, hvis der yderligere kunne deltage 2 - max. 3 personer, og gerne så vi får en god spredning i kompetencer (valg, it/teknik etc.) ☺

Kære alle

Fra København har vi mulighed for at deltage i alle tekniske dialoger med undtagelse af tirsdag den 21/8 fra kl. 9.30-12.30. Vi kan stille med 2 mand, hvis nødvendigt/muligt. Hvis Frederiksberg eller KL ønsker at deltage i stedet for København, deler vi gerne datoerne imellem os.

Mvh.

Kære alle

Jeg håber, I har haft en dejlig sommer. Jeg er - næsten - tilbage fra ferie.

Hvor er det godt at se så mange seriøse interessenter. Tak for materiale, mails og invitationen til at deltage i gennemgangen, Nicoline.

Jesper Eltved fra Aarhus Kommune vil, medmindre der er indvendinger, deltage i og bidrage til alle møderne/præsentationerne. Jesper, som en del af jer kender, er specialkonsulent i Borgerservices udviklingsafdeling og arbejder i valgsekretariatet. Jesper arbejder med forskellige udviklingsprojekter og har stor erfaring med valg og valgs udvikling.

Jeg vil foreslå Jesper Eltved deltager fra Aarhus Kommune hele vejen igennem i stedet for Jesper og jeg deler os, da jeg ikke kan deltage i alle møderne. Hermed får samme øre og øje mulighed for en gennemgående medvirken og bidrag. Jeg bidrager derudover gerne. Jesper og jeg gennemgår selvsagt materialet sammen og taler sammen med den fornødne fortrolighed, som processen tilsiger. Jeg regner med, I andre også byder ind.

Vi tales ved.

Bedste hilsner Lene

Emne: Plan for teknisk dialog om e-valg

Kære alle

Så har ministeriet afsluttet gennemgangen af de 11 indkomne ansøgninger til teknisk dialog og udvalgt 7 blandt disse. De udvalgte firmaer er:

- Assembly Voting
- KMD/Smartmatic
- Scytl
- Everyone Counts
- Opt2vote
- Indra
- DRS Data Services

Vi vil indkalde de pågældende til møder som følger:

Firma	Uge 34	Uge 35	Uge 36
Assembly Voting	Mandag 20/8 kl. 9:30-12:30		
Everyone Counts	Mandag 20/8 kl. 13:30-16:30		
Indra	Tirsdag 21/8 kl. 9:30-12:30		
Scytl		Mandag 27/8 kl. 9:30-12:30	
KMD/Smartmatic			Mandag 3/9 kl. 9:30-12:30
Opt2vote	Tirsdag 21/8 kl. 13:30-16:30		
DRS		Tirsdag 28/8 kl. 9:30-12:30	

Herudover vil vi give afslag til IBM, IVU Traffic Technologies og the United Institute of Informatics Problems of the National Academy of Sciences of Belarus/AVEST. KMD har sendt to anmodninger ind, én sammen med Smartmatic (som vil blive indkaldt) og én sammen med Scytl. Scytl har dog også sendt en selvstændig anmodning ind, og vi har derfor besluttet kun at indkalde KMD én gang og så tage Scytl separat. Breve til alle

ansøgere vil udgå senere i dag, så I må godt holde jeres viden om, hvem der er blevet udvalgt, for jer selv weekenden over.

Ud over embedsmænd fra ministeriet, 1-2 fra Demtech og en repræsentant fra Kammeradvokaten vil vi gerne indbyde repræsentanter fra kommunernes styregruppe om e-valg til at deltage i møderne. Af pladshensyn vil jeg bede jer om at udvælge max. 3-4 repræsentanter til hvert møde, det behøver ikke være de samme personer, som er med til alle møder. I må meget gerne melde tilbage, hvem der deltager fra kommunerne/KL i de forskellige møder. Jeg forsøgte at vedhæfte det materiale, vi har modtaget fra de 7 firmaer, som er indbudt til teknisk dialog, men mailen blev for stor, så de bouncede alle sammen. Jeg vil i stedet videresende de 7 mails til jer om lidt. Evt. spørgsmål rettes gerne til undertegnende.

God weekend!

Hej Nicoline

Fra Odense Kommune vil jeg gerne deltage i arbejdet.

Jeg kan alle dage, og har en it-mæssige indfaldsvinkel.

Jeg har været med til digitale valglistes i Odense Kommune, og IT-understøttelse af valgprocessen.

Med venlig hilsen

John Bonnerup

Kære alle

Tak for svaret til Lene om Jespers deltagelse – jeg hører også meget gerne fra jer andre vedr. deltagelse i et eller flere møder, så jeg kan få bestilt nok kaffe m.v. Jeg har været nødt til at ændre planen lidt efter ønske fra nogle af leverandørerne. Planen ser nu ud som følger:

Firma	Uge 34	Uge 35	Uge 36
Assembly Voting	Mandag 20/8 kl. 9:30-12:30 <i>Mødelokale B</i>		
DRS	Mandag 20/8 kl. 13:30- 16:30 <i>Mødelokale B</i>		
Indra	Tirsdag 21/8 kl. 9:30-12:30 <i>Mødelokale G</i>		
Opt2vote	Tirsdag 21/8 kl. 13:30- 16:30 <i>Mødelokale G</i>		
Everyone Counts		Tirsdag 28/8 kl. 9:30-12:30 <i>Mødelokale C</i>	
ScytI		Onsdag 29/8 kl. 10:00-	

		13:00 <i>Mødelokale</i> <i>B</i>	
KMD/Smartmatic			Mandag 3/9 kl. 9:30-12:30 <i>Mødelokale</i> <i>B</i>

Det ville være rigtig fint, hvis vi kunne mødes ½-1 time inden hvert møde, så vi kunne tale igennem, hvad vi skal fokusere på ved de forskellige leverandører, i det omfang det overhovedet er muligt. Da leverandørerne skal bruge mødelokalerne inden til klargøring af deres grej, kan vi holde formøde på Christians kontor eller et andet mødelokale i huset, afhængigt af, hvor mange vi bliver.

Efter råd fra Kammeradvokaten bliver jeg desværre nødt til at aflyse Demtechs deltagelse (jeg har ikke talt med Carsten endnu, men vil prøve at nå det i dag) - det er smadderærgeligt, men dels kan det gøre Assembly Voting inhabile i et senere udbud, dels frygter Kammeradvokaten, at de andre leverandører vil være meget påpasselige med, hvad de oplyser om deres produkter, hvis de får at vide, at der sidder repræsentanter i rummet med tætte bånd til én af deres konkurrenter. Vi prøver at få PWC ind i stedet for som tekniske eksperter.

Det var alt for nu – meld som sagt gerne snart tilbage, hvem der deltager i hvilke møder ud over Jesper som repræsentanter for kommunerne – og jeg ville være glad, hvis vi kunne begrænse det til 3, max. 4 repræsentanter fra kommunerne til hvert møde af pladshensyn ☺

Kære alle

Jeg håber, I har haft en dejlig sommer. Jeg er - næsten - tilbage fra ferie.

Hvor er det godt at se så mange seriøse interessenter. Tak for materiale, mails og invitationen til at deltage i gennemgangen, Nicoline.

Jesper Eltved fra Aarhus Kommune vil, medmindre der er indvendinger, deltage i og bidrage til alle møderne/præsentationerne. Jesper, som en del af jer kender, er specialkonsulent i Borgerservices udviklingsafdeling og arbejder i valgsekretariatet. Jesper arbejder med forskellige udviklingsprojekter og har stor erfaring med valg og valgs udvikling.

Jeg vil foreslå Jesper Eltved deltager fra Aarhus Kommune hele vejen igennem i stedet for Jesper og jeg deler os, da jeg ikke kan deltage i alle møderne. Hermed får samme øre og øje mulighed for en gennemgående medvirken og bidrag. Jeg bidrager derudover gerne. Jesper og jeg gennemgår selvsagt materialet sammen og taler sammen med den fornødne fortrolighed, som processen tilsiger. Jeg regner med, I andre også byder ind.

Vi tales ved.

Bedste hilsner Lene

Emne: Plan for teknisk dialog om e-valg

Kære alle

Så har ministeriet afsluttet gennemgangen af de 11 indkomne ansøgninger til teknisk dialog og udvalgt 7 blandt disse. De udvalgte firmaer er:

- Assembly Voting
- KMD/Smartmatic

- Scytl
- Everyone Counts
- Opt2vote
- Indra
- DRS Data Services

Vi vil indkalde de pågældende til møder som følger:

Firma	Uge 34	Uge 35	Uge 36
Assembly Voting	Mandag 20/8 kl. 9:30-12:30		
Everyone Counts	Mandag 20/8 kl. 13:30-16:30		
Indra	Tirsdag 21/8 kl. 9:30-12:30		
Scytl		Mandag 27/8 kl. 9:30-12:30	
KMD/Smartmatic			Mandag 3/9 kl. 9:30-12:30
Opt2vote	Tirsdag 21/8 kl. 13:30-16:30		
DRS		Tirsdag 28/8 kl. 9:30-12:30	

Herudover vil vi give afslag til IBM, IVU Traffic Technologies og the United Institute of Informatics Problems of the National Academy of Sciences of Belarus/AVEST. KMD har sendt to anmodninger ind, én sammen med Smartmatic (som vil blive indkaldt) og én sammen med Scytl. Scytl har dog også sendt en selvstændig anmodning ind, og vi har derfor besluttet kun at indkalde KMD én gang og så tage Scytl separat. Dear Mrs. Nyholm

We very much appreciate your invitation and we'll do our best to make the audience productive and instructive as possible.

After reviewing the details of the invitation we have two questions that we kindly ask you to clarify when you best can:

1. We have a setup to prepare that involves different pieces of hardware, software and supporting documents. It's preparation takes at least 1-2 hours to setup. So would it be possible to gain access with that time advance to the room where the technical location will take place?
2. Even better would be to have the meeting on the 28th or 29th August , again with some extra time prior to the audition to do the setup. Would it be possible to reschedule the audition for any of those dates?

Looking forward for your news.

Yours sincerely.

Dear Jose,

Ok to rescheduling our meeting for Wednesday 29th of August at 10:00 with possibility for preparations from 8:00. Please present yourselves to the guard at Slotsholmsgade no. 12 (last building on Slotsholmsgade nearest the harbour, big greenish more modern building) at 8:00 o'clock and I will meet you at 8 or perhaps 5-10 minutes past 8, depending on the traffic.

Best regards,

Nicoline Miller

Dear Nicoline

That would be perfect.

If you can kindly reschedule for Wednesday 29th we will start with the preparations at 8:00 and that way everything will be aligned for the 10:00 audition.
We understand that the location will be the main offices of the Ministry of Economic Affairs and the Interior (Slotsholmsgade 10-12), as indicated in the initial Invitation's pdf.

So if you can confirm the date change, I think we can close the agenda for that day/time.

Best regards

Hi Nicoline,

Yes indeed – We do aim to present some specific modules of our solution which we know are of specific interest in terms of non-remote e-voting plus paper trail within the Danish context – If we can have access to the room from 8am that would be perfect.

Many thanks and we look forward to seeing you and your colleagues on 28th August.

Kindest regards,

Mike

Subject: SV: Everyone counts - invitation til teknisk dialog(S)

Dear Mike,

Do you need some time before the meeting to prepare for a demonstration of your e-voting equipment etc.? We would be really interested in seeing a demonstration of one of your e-voting solutions that you, based on your knowledge of some of our needs (non-remote e-voting at polling stations with the possibility of paper trail), would think would be suitable in a Danish context. If so, you could have access to the room where the meeting will take place from approx. 8:00 am. Please let me know at your earliest convenience if this would be of interest to you.

Kind regards,
Nicoline

Dear Nicoline,

I hereby confirm that Everyone Counts would be delighted to accept the invitation to participate in the Technical Dialog with the Ministry of Economic Affairs and the Interior on **Tuesday 28th August 2012 from 9:30 am – 12:30 am.**

In attendance will be:

Mike Summers – Director of Sales, Worldwide

Mike Joyce – Technical/Solutions Architect

If you could please advise who will be in attendance from the Ministry I would be most grateful.

Many thanks and kindest regards,

Mike

Kære alle

Tak for svaret til Lene om Jespers deltagelse – jeg hører også meget gerne fra jer andre vedr. deltagelse i et eller flere møder, så jeg kan få bestilt nok kaffe m.v. Jeg har været nødt til at ændre planen lidt efter ønske fra nogle af leverandørerne. Planen ser nu ud som følger:

Firma	Uge 34	Uge 35	Uge 36
Assembly Voting	Mandag 20/8 kl. 9:30-12:30 <i>Mødelokale B</i>		
DRS	Mandag 20/8 kl. 13:30-16:30 <i>Mødelokale B</i>		
Indra	Tirsdag 21/8 kl. 9:30-12:30 <i>Mødelokale G</i>		
Opt2vote	Tirsdag 21/8 kl. 13:30-16:30 <i>Mødelokale G</i>		
Everyone Counts		Tirsdag 28/8 kl. 9:30-12:30 <i>Mødelokale C</i>	
Scytl		Onsdag 29/8 kl. 10:00-13:00 <i>Mødelokale B</i>	
KMD/Smartmatic			Mandag 3/9 kl. 9:30-12:30 <i>Mødelokale B</i>

Det ville være rigtig fint, hvis vi kunne mødes ½-1 time inden hvert møde, så vi kunne tale igennem, hvad vi skal fokusere på ved de forskellige leverandører, i det omfang det overhovedet er muligt. Da leverandørerne skal bruge mødelokalerne inden til klargøring af deres grej, kan vi holde formøde på Christians kontor eller et andet mødelokale i huset, afhængigt af, hvor mange vi bliver.

Efter råd fra Kammeradvokaten bliver jeg desværre nødt til at aflyse Demtechs deltagelse (jeg har ikke talt med Carsten endnu, men vil prøve at nå det i dag) - det er smadderægerligt, men dels kan det gøre Assembly Voting inhabile i et senere udbud, dels frygter Kammeradvokaten, at de andre leverandører vil være meget påpasselige med, hvad de oplyser om deres produkter, hvis de får at vide, at der sidder repræsentanter i rummet med tætte bånd til én af deres konkurrenter. Vi prøver at få PWC ind i stedet for som tekniske eksperter.

Det var alt for nu – meld som sagt gerne snart tilbage, hvem der deltager i hvilke møder ud over Jesper som repræsentanter for kommunerne – og jeg ville være glad, hvis vi kunne begrænse det til 3, max. 4 repræsentanter fra kommunerne til hvert møde af pladshensyn ☺

Til: DEP OIM Valg
Emne: Prior information notice 2012/S 122-201846 - For the attention of: Chief Election Officer Nicoline Nyholm Miller

Dear Nicoline,

On behalf of DRS Data Services Limited and as per the requirements in Prior Information Notice 2012/S 122-201846, I request participation in the technical dialogue for the implementation of electronic voting and counting systems in Denmark.

DRS specialises in electronic counting of votes and has been delivering elections services since 1991. The list below includes some of the key elections delivered since then:

- London Mayoral & Assembly Elections 2000, 2004 and 2012;
- European Parliamentary Elections (London Region) 2004
- Westminster Council Elections 2002 and 2006;
- Norwegian Elections 1991, 1995 and 1996;
- Oman Legislative Council Elections 2004, 2008 and 2011; and
- Scottish Parliamentary & Local Government Election 2007.

The projects delivered in London and Scotland are among the largest and most complex elections to be counted electronically. The software was developed in-house, the scanners were designed and manufactured in-house and the ballot papers were designed and printed in-house. The delivery of the project to electronic count votes was projected managed by the DRS team. Attached is our e-Election brochure which also details how we deliver e-Voting combined with e-Counting.

I have included case studies from Oman Elections which demonstrates that DRS can deliver complex elections projects internationally as well as in the UK. Also included is the Greater London Authority Elections case study which is one of the largest and most complex electronically counted elections ever delivered. The Scottish by-election case study shows that DRS can deliver smaller scale projects at short notice.

The case studies also show that DRS has the personnel and financial capacity to deliver large scale projects. Evidence of our financial capacity is available from our most recent [financial report](#).

This information provides documented evidence of DRS' experience of the development, implementation and operation of electronic voting and counting systems for large institutions and in particular, public institutions.

I look forward to hearing from you in due course.

Best Wishes,

John

Kære Jan Winther

I fortsættelse af ministeriets invitation til KMD/Smartmatic til teknisk dialog den 3/9 2012 vil jeg spørge, om I har behov for lidt tid inden mødet til klargøring af udstyr til brug for en demonstration af Smartmatic's e-valgsteknologi – i så fald bedes I give besked herom hurtigst muligt. I vil kunne få adgang til mødelokalet fra kl. 8.

Dear Mike,

Do you need some time before the meeting to prepare for a demonstration of your e-voting equipment etc.? We would be really interested in seeing a demonstration of one of your e-voting solutions that you, based on your knowledge of some of our needs (non-remote e-voting at polling stations with the possibility of paper trail), would think would be suitable in a Danish context. If so, you could have access to the room where the meeting will take place from approx. 8:00 am. Please let me know at your earliest convenience if this would be of interest to you.

Kind regards,
Nicoline

Invitation to a technical dialogue on a system for electronic voting in Denmark

Dear Mike Summers,

Following the notice by the Ministry of Economic Affairs and the Interior calling for applications to participate in a technical dialogue on the supply of a non-remote electronic voting and counting system for use in Danish statutory elections (ref.: 2012.OJ/S122-201846, available at: <http://ted.europa.eu/udl?uri=TED:NOTICE:201846-2012:TEXT:EN:HTML>), and Everyone Counts' request for participation received on 3 August 2012, the Ministry is pleased to invite Everyone Counts to a technical dialogue with the Ministry on the above mentioned topic on the following date and time:

Tuesday 28 August 2012, at 9:30-12:30.

The Ministry has allocated a maximum of three hours for the meeting, of which approx. 45 minutes will be set aside for a demonstration by Everyone Counts of the company's e-voting system. The meeting will be attended by officers of the Ministry, representatives of some of the municipalities that wish to conduct trials with e-voting, and the legal advisor to the Danish government (Kammeradvokaten). The meeting will be carried out in Danish or English according to your preference.

Please confirm your attendance at the designated date and time as soon as possible to: valg@oim.dk and kindly enclose the names of the representatives from Everyone Counts that will be attending the meeting. The address is: Slotsholmsgade no. 12, Copenhagen, situated in close proximity to the Parliament (Folketinget). Please present yourself to the guard showing this invitation to the meeting.

The purpose of the technical dialogue is to explore the possibilities the market has to offer regarding e-voting technology at this point in time as part of a preliminary study in preparation of the subsequent tender process, and to get an economic overview of the economic implications of introducing e-voting in Denmark.

The Ministry of Economic Affairs and the Interior reserves the right to use any information imparted by Everyone Counts in the company's request for participation or during the technical dialogue for the subsequent tender process, unless Everyone Counts has stated as a prior condition that information is imparted in confidentiality, constitutes a commercial secret, or consists of exclusive rights. Please note that the Ministry of Economic Affairs and the Interior as a public authority is subject to the Public Records Act. Notwithstanding any confidentiality statements etc. made by participating companies, the Ministry can thus be obliged to give access to documents etc. to the extent following from its obligations under the Public Records Act.

For good measure, please be informed that any expenses which Everyone Counts might incur by participating in the technical dialogue will not be reimbursed by the Ministry.

The Ministry will draw up a report upon completion of the technical dialogue regarding the future tender process for the purchase of an e-voting system, in which a sum-up of the process and any additional information that may arise will be included. The report will be made publicly available at: <http://valg.im.dk>.

The Ministry of the Interior and Health has received 11 applications for participation in the technical dialogue, of which 7 companies have been selected for a bilateral technical dialogue with the Ministry. The companies that have been selected have all extensive documented experience with the development, implementation and operation of electronic voting systems for elections for popularly elected organs. Participation in the technical dialogue does not offer any advantage in relation to the subsequent tender process.

If you have any questions regarding the technical dialogue, please do not hesitate to contact me at: valg@oim.dk, tel. no. (direct): (+45) 72 28 25 22.

Sincerely yours,

Nicoline Nyholm Miller
Chief Election Officer

Dear Nicoline,

Many thanks for the confirming Everyone Counts participation in the technical dialog session – However, would it be possible to attend a session on the on any date during the week commencing 27th August as I have a scheduling conflict for w/c 20th in which I am out of the country for that entire week.

If you could please advise if this is possible that would be much appreciated – We have full flexibility for the w/c 27th August and can meet on any date/time you require.

Many thanks and kindest regards,

Mike

Subject: Invitation to technical dialogue on e-voting system for Denmark

Dear Mr. Summers,

With reference to your request for participation in the technical dialogue re. the supply of an e-voting system for statutory elections in Denmark, please find attached to this e-mail an invitation to participate in the technical dialogue at the Ministry of Economic Affairs and the Interior.

Yours sincerely,

Chief Election Officer
Nicoline Nyholm Miller

Invitation to a technical dialogue on a system for electronic voting in Denmark

Dear Jesper Lauge Kilde,

Following the notice by the Ministry of Economic Affairs and the Interior calling for applications to participate in a technical dialogue on the supply of a non-remote electronic voting and counting system for use in Danish statutory elections (ref.: 2012.OJ/S122-201846, available at:

<http://ted.europa.eu/udl?uri=TED:NOTICE:201846-2012:TEXT:EN:HTML>), and Assembly Voting's request for participation received on 3 August 2012, the Ministry is pleased to invite Assembly Voting to a technical dialogue with the Ministry on the above mentioned topic on the following date and time:

Monday 20 August 2012, at 9:30-12:30.

The Ministry has allocated a maximum of three hours for the meeting, of which approx. 45 minutes will be set aside for a demonstration by Assembly Voting of the company's e-voting system. The meeting will be attended by officers of the Ministry, representatives of some of the municipalities that wish to conduct trials with e-voting, and the legal advisor to the Danish government (Kammeradvokaten). The meeting will be carried out in Danish or English according to your preference.

Please confirm your attendance at the designated date and time as soon as possible to: valg@oim.dk and kindly enclose the names of the representatives from Assembly Voting that will be attending the meeting. The address is: Slotsholmsgade no. 12, Copenhagen, situated in close proximity to the Parliament (Folketinget). Please present yourself to the guard showing this invitation to the meeting.

The purpose of the technical dialogue is to explore the possibilities the market has to offer regarding e-voting technology at this point in time as part of a preliminary study in

preparation of the subsequent tender process, and to get an economic overview of the economic implications of introducing e-voting in Denmark.

The Ministry of Economic Affairs and the Interior reserves the right to use any information imparted by Assembly Voting in the company's request for participation or during the technical dialogue for the subsequent tender process, unless Assembly Voting has stated as a prior condition that information is imparted in confidentiality, constitutes a commercial secret, or consists of exclusive rights. Please note that the Ministry of Economic Affairs and the Interior as a public authority is subject to the Public Records Act. Notwithstanding any confidentiality statements etc. made by participating companies, the Ministry can thus be obliged to give access to documents etc. to the extent following from its obligations under the Public Records Act.

For good measure, please be informed that any expenses which Assembly Voting might incur by participating in the technical dialogue will not be reimbursed by the Ministry.

The Ministry will draw up a report upon completion of the technical dialogue regarding the future tender process for the purchase of an e-voting system, in which a sum-up of the process and any additional information that may arise will be included. The report will be made publicly available at: <http://valg.im.dk>.

The Ministry of the Interior and Health has received 11 applications for participation in the technical dialogue, of which 7 companies have been selected for a bilateral technical dialogue with the Ministry. The companies that have been selected have all extensive documented experience with the development, implementation and operation of electronic voting systems for elections for popularly elected organs. Participation in the technical dialogue does not offer any advantage in relation to the subsequent tender process.

If you have any questions regarding the technical dialogue, please do not hesitate to contact me at: valg@oim.dk, tel. no. (direct): (+45) 72 28 25 22.

Sincerely yours,

Nicoline Nyholm Miller
Chief Election Officer

Kære Jan Winther

Under henvisning til din mail af 20. juli 2012 på vegne af KMD/Smartmatic med anmodning om deltagelse i tekniske dialog om et system til elektronisk stemmeafgivning til lovbestemte valg i Danmark, vedhæfter jeg invitation til deltagelse i teknisk dialog i den ovenfor nævnte konstellation.

Med hensyn til KMD's anden anmodning af 20. juli 2012 om at deltage i teknisk dialog sammen med Scytl og Zetes, har ministeriet valgt at indbyde Scytl afholde en separat teknisk dialog med Scytl, som har sendt en separat anmodning om deltagelse i teknisk dialog til ministeriet. KMD vil derfor ikke blive indbudt til teknisk dialog sammen med Scytl og Zetes, men ministeriet takker for henvendelsen.

Med venlig hilsen

Valgkonsulent, Kommunaljura

Dear Mr. Gorchs,

With reference to your request for participation in the technical dialogue re. the supply of an e-voting system for statutory elections in Denmark, please find attached to this e-mail an invitation to participate in the technical dialogue at the Ministry of Economic Affairs and the Interior.

Yours sincerely,

Chief Election Officer
Nicoline Nyholm Miller

Invitation to a technical dialogue on a system for electronic voting in Denmark

Dear Jose Gorchs,

Following the notice by the Ministry of Economic Affairs and the Interior calling for applications to participate in a technical dialogue on the supply of a non-remote electronic voting and counting system for use in Danish statutory elections (ref.: 2012.OJ/S122-201846, available at: <http://ted.europa.eu/udl?uri=TED:NOTICE:201846-2012:TEXT:EN:HTML>), and Scytl's request for participation received on 30 July 2012, the Ministry is pleased to invite Scytl to a technical dialogue with the Ministry on the above mentioned topic on the following date and time:

Monday 27 August 2012, at 9:30-12:30.

The Ministry has allocated a maximum of three hours for the meeting, of which approx. 45 minutes will be set aside for a demonstration by Scytl of the company's e-voting system. The meeting will be attended by officers of the Ministry, representatives of some of the municipalities that wish to conduct trials with e-voting, and the legal advisor to the Danish government (Kammeradvokaten). The meeting will be carried out in Danish or English according to your preference.

Please confirm your attendance at the designated date and time as soon as possible to: valg@oim.dk and kindly enclose the names of the representatives from Scytl that will be attending the meeting. The address is: Slotsholmsgade no. 12, Copenhagen, situated in close proximity to the Parliament (Folketinget). Please present yourself to the guard showing this invitation to the meeting.

The purpose of the technical dialogue is to explore the possibilities the market has to offer regarding e-voting technology at this point in time as part of a preliminary study in preparation of the subsequent tender process, and to get an economic overview of the economic implications of introducing e-voting in Denmark.

The Ministry of Economic Affairs and the Interior reserves the right to use any information imparted by ScytI in the company's request for participation or during the technical dialogue for the subsequent tender process, unless ScytI has stated as a prior condition that information is imparted in confidentiality, constitutes a commercial secret, or consists of exclusive rights. Please note that the Ministry of Economic Affairs and the Interior as a public authority is subject to the Public Records Act. Notwithstanding any confidentiality statements etc. made by participating companies, the Ministry can thus be obliged to give access to documents etc. to the extent following from its obligations under the Public Records Act.

For good measure, please be informed that any expenses which ScytI might incur by participating in the technical dialogue will not be reimbursed by the Ministry.

The Ministry will draw up a report upon completion of the technical dialogue regarding the future tender process for the purchase of an e-voting system, in which a sum-up of the process and any additional information that may arise will be included. The report will be made publicly available at: <http://valg.im.dk>.

The Ministry of the Interior and Health has received 11 applications for participation in the technical dialogue, of which 7 companies have been selected for a bilateral technical dialogue with the Ministry. The companies that have been selected have all extensive documented experience with the development, implementation and operation of electronic voting systems for elections for popularly elected organs. Participation in the technical dialogue does not offer any advantage in relation to the subsequent tender process.

If you have any questions regarding the technical dialogue, please do not hesitate to contact me at: valg@oim.dk, tel. no. (direct): (+45) 72 28 25 22.

Sincerely yours,

Nicoline Nyholm Miller
Chief Election Officer
